

SlipStream SP

Web & Email Acceleration

SlipStream SP is a powerful web and email acceleration solution that enables ISPs, ASPs and Carriers to easily deliver a value-added service over existing dial-up and wireless networks at up to six times the normal speed. SlipStream's patented proprietary data compression algorithm reduces bandwidth and increases the speed of Internet access, creating an end-to-end solution that satisfies your customers' need for affordable speed and your need for new revenue opportunities.

The SlipStream SP Advantage:

- ✓ Using SlipStream SP, you will reduce subscriber churn and increase profits
- ✓ SlipStream SP offers superior, patented technology and the best compression performance, with speed increases up to 6X faster than traditional dial-up
- ✓ SlipStream SP integrates seamlessly into existing architecture, allowing you to deliver effective high speed over existing dial-up and wireless networks with no infrastructure change
- ✓ SlipStream SP offers fast & flexible implementation for both service providers and your customers
- ✓ SlipStream SP also offers many value-added features that your customers want, including both Pop-Up & Ad Blockers
- ✓ SlipStream SP is a unique end-to-end business solution for ISPs, including flexible business models, full branding and superior customer service and support.
- ✓ SlipStream is focused on ISPs - we understand your needs and never compete for subscribers!

Jacob Ziv, a co-founder of the Lempel-Ziv code, describes the work of SlipStream's Dr. Yang as an "elegant and efficient" innovation that has the potential to "significantly outperform" his own famous Algorithm. "This is indeed a very significant result," says Ziv.

*Technology Spotlight
(October 2002)*

"Technology like this has the potential to significantly elongate the life cycle of slower speed connections"

*Mark R. Goldston,
Chairman and CEO,
United Online*

Unsurpassed Results*

- ✓ Improved download times by up to 5X
- ✓ Compressed text components of Web pages by 5X or more
- ✓ Improved Web page download times by an average of 2X
- ✓ Compressed email messages & attachments more than 4.5X
- ✓ Blocks most pop-ups

Satisfying Your Need For Speed

What gets accelerated?

- ✓ Text data: lossless - http, xml, java
- ✓ Graphics: lossey - gif, tif, png, jpeg, etc.
- ✓ Flash: both text and graphics
- ✓ Banner Ads
- ✓ Web based email, including attachments
- ✓ POP3/SMTP Email

The Accelerator Server is, most frequently, located at the service provider's site, but it can also be located in a remote location - and still deliver greatly improved results!

How does it work?

The SlipStream platform is comprised of two components: a scalable, high-performance, configurable content acceleration server and a lightweight client software application. The SlipStream Accelerator Server retrieves data from the requested external web server using a high-speed Internet connection, then compresses and optimizes the content for the last mile trip.

SlipStream SP Server:

Ease of Deployment - no infrastructure change needed - implementation in under 2 weeks

Scalability and Load Balancing - no additional hardware to buy - easy to increase capacity and ensure proper resource utilization and uninterrupted service

System Compatibility - compatible with all third-party web applications, including commercial caching products, any authentication methods, dialers, and Parental Control and SPAM utilities

Object Caching - transparent data caching further enhances acceleration

System Security - includes access control features that grant access to authorized users only

Statistics Logging - maintains statistics on system performance levels, current number of users, peak users, access times, user information, and data transfer information.

SlipStream SP Client:

Single-Click Web Browsing

Lightweight Design - the client application installer is less than 1MB and total disk space once installed is only 5MB

Powerful User Controls - powerful content customization options, including intuitive image quality management and content filtering capabilities

Comprehensive Statistical Information - detailed information on the compression being achieved, in real-time for both downstream and upstream traffic

Extensive Compatibility:

- ✓ Full Windows support (95/98, ME, 2000, NT and XP) plus MAC OS-X and PDAs
- ✓ Extensive browser support (IE 4.0+, Netscape 4.0+)
- ✓ Supports multiple connectivity modes - LAN, WAN, dialup, wireless, ISDN, FRAME
- ✓ Supports HTTP, POP3 and SMTP protocols

We've been proven the fastest!

Two recent independent reviews confirm that SlipStream SP is the fastest accelerated dialup solution. *Links to these documents can be found on our web site, www.slipstreamdata.com.*

● **Veritest report (Nov. 03)** SlipStream's Web Accelerator accessed first web pages more than 33 percent faster and improved average download times by almost 10 percent over the closest competitor

● **Wall Street Journal article (Jan. 04)** - our client's uniquely branded product outperformed the competition in an independent head-to-head test
